

Compact hydraulic bolt tensioners

Series
CTP-C

**BOLT
TIGHTENING
EQUIPMENT**

PRODUCT
PAGE

The compact hydraulic bolt tensioners have the thread integrated in the piston.

This characteristic reduces the overall size at a minimum level, allowing you to have a tensioner with extremely small dimensions and to be able to operate where other tensioners could not be installed.

F.P.T. produces this model of tensioner, with threaded piston, in all those cases in which it is not possible to meet the requirements of dimensions without recurring to multistage tensioner.

Spring return version or pneumatic return can be realised to speed up the return operations of the piston.

To be compact
