HYDRAULIC TORQUE WRENCHES

SQUARE DRIVE, LOW CLEARANCE AND PUMPS

Hydraulic torque wrenches square drive | HTW-BT Series

- Max working pressure 700 bar
- Designed for tightening and loosening.
- 10 different models from 110 Nm up to 72.000 Nm torque power.
- Accuracy $\pm 3\%$ across the full stroke.
- $360^\circ \times 180^\circ$ multi-positional swivel quick release couplings.
- Suitable for continuous operation at maximum pressure.
- High resistance with aluminum-titanium and light body.
- 360° adjustable reaction arm with safety lock feature.

Low clearance hydraulic torque wrenches | HTW-LOW Series

- Repeatability $\pm 3\%$
- Max working pressure 700 bar
- 5 different models from 230 Nm to 45.000 Nm
- Designed for tightening and loosening

- 360° x 180° uni swivel quick release couplings
- Maximum torque power with minimum wall thickness
- Various cassettes, adaptors and reducers are available
- Durable structure, aluminum-titanium alloy and light body
